Services: Fire Department
Other:

Message Body:

The United Steam Fire Engine Company No. 3, Inc. is comprised of three stations in the City of Frederick in Maryland. We serve a first due population of approximately 45,000 residents. We are located in Frederick County that has a 249 square mile boundary protecting over 230,000 residents.

We are seeking a donation of a UAV to assist with search and rescue, advanced technical rescue, water rescue, and training events. Although this resource would be housed at one of our stations, it would be a county-wide resource that could be deployed not only throughout our County but available to other Counties and States as well that we routinely provide with mutual aid.

Our County responds to approximately 12-20 mountain/woodland rescue each year, multiple wildland incidents, 12-20 water rescues, and other events requiring advanced technical rescue capabilities. We also respond to assist local law enforcement with search related activities. This resource could also be deployed for law enforcement and emergency management purposes.

Having a UAV with infrared capabilities would provide another quick deployment tool for use by our specialty team personnel, law enforcement, and allied agencies. We currently do not have budgeted funds for a UAV; however, we do have sufficient funds that would be used for maintenance and support.

Please feel free to contact me with any questions or concerns.
