Position: Training Coordinator/Asst Chief
Address: 645 E. Cope Industrial Way, Palmer Alaska 99645
Services: Fire Department
Other:

Message Body:

Palmer Fire & Rescue could use assistance in acquiring a UAV/UAS drone. The department covers over 2000 square miles for rescue services with the largest majority only accessible by four wheelers, snowmobiles (winter), or foot. In addition, we assist neighboring departments when requested and some of their coverage area for rescue is larger than ours. We also assist local police agencies in searching for lost children or adults. Having a drone to narrow the search areas during those emergencies would be extremely helpful. During some of the emergencies, we are told a location for the patient(s) and they are only a mile away. Most times, the patient(s) are at a greater distance and not in the location given. Using the drone can help locate any patient and help to confirm locations.

Thank you for all consideration to the request.
