Message Body:

We are a small rural fire department with 3 stations currently. We have a staff of 45 paid 24/48 firefighters. We cover over 100 square miles of suburban/wildland. We perform search and rescue, water rescue, rope rescue, etc. Over the last few years we have lost multiple citizens due to being swept away by rushing water. We also have some areas that have a big potential for high fire danger. The ability to quickly search for people in rushing water and assessing the move of a brush fire would greatly improve our service to the citizens. Thank you for your consideration.
