Position: Battalion Chief
Address: 2850 19th St S
State: Homewood
City: AI
Zip code: 35209
Services: Fire Department, Search & Rescue
Other:

Message Body:

Having access to rugged drone technology could serve to enhance the safety of our personnel and our response capability to fire and EMS calls in our community. The ability to have a drone in the air during a structure fire enables us to have a continuous 360 degree picture of the emerging incident and will aid in the decision-making process. We have a several major thoroughfares crossing our city borders and a enhanced chance of hazmat incidents as a result. As with structure fires, being able to send a drone to fly the area of the incident could provide valuable information without the added risk of human exposure for recon. Also, our department participates in the Alabama Mutual Aid System as a heavy rescue unit. We have response capability for large scale incidents that could occur anywhere within the state of Alabama. Having the ability to put a drone in the air could greatly facilitate response activities during large scale incidents. As such, It is my hope that you will consider a donation to our department to assist in these areas.
