## MEDIA ADVISORY

**Global Drone Manufacture AUTEL ROBOTICS teams up with the National Public Safety Drone Donation Program NPS-DDP to provide Free Drones to departments in need!**

**WHAT:** On November 26th 2018 Stevensville Rural Fire District, made application to the National Public Safety Drone Donation Program (NPS-DDP) / Airborne Works for a Free Drone . NPS-DDP was founded by [Airborne Works](#). AUTEL Robotics a global drone manufacture has teamed up with NPS-DDP to donate NEW Drones to departments in need and the Stevensville Rural Fire District has been chosen by AUTEL Robotics to receive one of [9 Drone kits to be donated](#) The donation will be shipped to the department, they have on staff an FAA 107 Licenced drone pilot to fly the drone for the fire company. The new lifesaving technology is sure to help save lives.

**WHEN:** TBD

**WHERE:** Stevensville Montana 59870

### DETAILS:

Stevensville Rural Fire District, works to provide their residents and those in surrounding communities with exceptional fire protection, safety and rescue services. As such, the company is always looking for creative ways to enhance their services and operations to benefit all those they serve and protect.

In emergency situations, every second is deemed important. UAV (unmanned aerial vehicles) and drone technology can provide lifesaving assistance to public safety departments/companies with emergency calls. Unfortunately, many public safety departments/companies across the nation cannot afford to purchase UAVs/drones, as the cost of the technology is very high, this forces many to simply go without.

Airborne Works hoped to alleviate this issue when establishing the [National Public Safety Drone Donation Program](#) (NPS-DDP) – a UAV/drone donation program whereby public safety departments/companies may apply to receive a UAV/drone at no cost to the department/company.

Stevensville Rural Fire District, applied for a UAV/drone through NPS-DDP. They have been chosen as the recipient of a drone that will be generously donated to the program by [AUTEL Robotics](#).
